

An excellent tool for cleaning walls and tanks. Often used to scrub stubborn dirt e.g. pastry, meat, sticky glucose type ingredients. The swivel neck allows the operator to clean underneath equipment. It is designed to hold a scouring pad of varying roughness. The clip mechanism is stainless steel and is very robust. This mechanism prevents the pad from falling off once heavy with water.

New equipment should be cleaned, disinfected, sterilised and any labels removed, as appropriate to its intended use, e.g. high risk vs. low risk food production areas, general hospital areas vs. intensive care units, before use.
